Southern Africa

 **MANITOU**
HANDLING YOUR WORLD

**AGRICULTURE
SOLUTION**

YOUR PARTNER IN AGRICULTURAL INNOVATION

For over 40 years, we have been supporting the agricultural industry by providing safe, efficient, and high-performance material handling solutions.

Manitou designs and manufactures a wide range of machines recognised for their durability and adaptability in demanding agricultural environments. Whether working in livestock, arable, or mixed farming, our solutions optimise your productivity and efficiency.

With a global network of 800 dealers, we offer expert advice and essential local services, including training, after-sales support, and financing solutions to help you invest in the right equipment for your farm.

From handling bales to loading fertiliser and managing infrastructure, Manitou provides innovative solutions tailored to your farm's needs.

COMPACT TELEHANDLER

The MLT-X 625 is the ideal choice for working in confined spaces such as barns, poultry houses, and storage sheds. Its compact size and manoeuvrability make it perfect for precision handling of feed, bales, and big bags or palletised goods, even on uneven terrain.

With optimised comfort for operators and precise control, this machine improves workflow efficiency while reducing fatigue.

Lift capacity

2.5 tonnes

Lift height

6 m

Engine power

75 hp

Compact design for
tight spaces

MLT-X 625

Looking for a compact yet powerful telehandler for your farm?

Lift capacity

3.5 tonnes

Lift height

7 m

Engine power

101 hp

Advanced hydraulic system
for smooth operation

VERSATILITY TELEHANDLER

The MLT-X 735 is built for durability and power, making it a must-have for farms handling large loads daily. From towing trailers to stacking hay bales and loading fertiliser, this telehandler is designed to enhance efficiency and support main farming activities during production cycles.

Its ergonomic cabin and intuitive controls make long working hours more comfortable, ensuring maximum productivity on the farm.

MLT-X 735

Need a versatile and high-performance machine?

HIGH PRODUCTION TELEHANDLER

The MLT-X 850 is built for strength and endurance in intensive farming operations in high-production environments.

With a reinforced chassis and advanced technology, this telehandler ensures maximum efficiency and durability in agricultural settings.

Lift capacity

5 tonnes

Lift height

8 m

Engine power

141 hp

Robust design for
heavy-duty applications

MLT-X 850

Handling bulk materials like grain, feeds or vegetables?

BACKHOE LOADER

Looking for an all-purpose machine that handles digging, trenching, and loading?

The MBL-X 920 is your reliable partner for infrastructure work on the farm, from drainage projects to land preparation.

Engine power up to

92 hp

Safe working capacity

1 tonne

Unbreakable

standard

4 x 4

MBL-X 920

**Looking for an all-purpose machine
that handles digging, trenching, and loading?**

lift capacity

600 to 820 kg of ROC

Engine power

50 to 70 hp

Compact dimensions

Advanced hydraulic system
for smooth operation

SKID STEER LOADER

Manitou's range of skid steer loaders is designed to handle various agricultural tasks, from feeding livestock to cleaning barns and poultry houses, and moving in and around orchards efficiently.

**1340R
1640R
1800R**

**Looking for a true small, versatile machine
for compact handling applications?**

ATTACHMENTS SELECTION

Manitou's range is designed to handle various agricultural tasks, from feeding livestock to cleaning barns and poultry houses, and simplifying your day to day tasks

Feed and silage

Solutions for silage cutting, preparation and distribution.

Manure loading

Handling solutions for all types of manure (heavy, straw or powdery).

Bale handling

Wide range of solutions for handling square, round, wrapped and unwrapped bales.

General handling

Simple, effective solutions for handling palletised or non-palletised loads.

A quick and easy coupling system

In order to save you time, the coupling system for Manitou attachments (TS: simple fork carriage with manual or hydraulic locking) is reliable, quick and easy to use. Attach and detach attachments with ease.

Various ag applications

Bulk handling, silage cutting and/or manure handling solutions.

Handling of grain and light bulk

The essential attachment for storage of grain, fertiliser, mineral supplements, etc.

Maintenance

Sweeping and cleaning solutions for your farm maintenance.

OTHER MACHINES AGRICULTURAL

Beyond telehandlers, skid steers, and backhoe loaders, Manitou offers a comprehensive range of machines designed for farm operations:.

Warehousing

Industrial and rough terrain forklift

Articulated loaders

Agricultural telehandlers

INNOVATION AS OUR DNA

Beyond telehandlers, skid steers, and backhoe loaders, Manitou offers a comprehensive range of machines designed for farm operations:.

Intelligent hydraulics

The intelligent hydraulics pack offers 3 functions:

Quick Lift:

Enables 2 synchronised movements (boom lifting and telescope extension) for vertical lifting.

Bucket Shaker:

Starts an automatic 4 shakes sequence to remove sticky material from the bucket.

Return To Load:

Manages all movements automatically (boom lowering, telescope retraction and positioning of the bucket) to return to a memorised work position defined by the operator (angle of the boom and angle of bucket).

- Fatigue free Productivity: increased productivity with automatic loading assistance.
- Operator friendly: only 1 action needed on JSM Joystick to achieve 3 cumulated hydraulics movements and return to the memorised work position.

Joystick Switch and Move (JSM)

The JSM joystick groups main hydraulic & translation functions at your fingertips (boom, telescope, tilt, hydraulic attachment, machine direction FNR, gear change depending on transmission).

- Reduction of muscular fatigue
- All hydraulic and transmission functions with one hand
- Facilitates the handling of loads
- Optimises the performance of the telehandler

Ecomode

The Eco mode automatically decreases engine rpm when machine speed is stabilised in the high range to decrease fuel consumption. The hydrostatic transmission compensate engine rpm reduction to keep the same translation speed.

- You can reduce fuel consumption by up to 8% during intensive towing and hauling operations on the road.
- Reduction of pollutant emissions: you reduce environmental impact
- Noise reduction: you gain in working comfort thanks to the engine noise level
- TCO reduction: your system contributes to the overall reduction of the TCO (Total Cost of Ownership) of your agricultural telescopic handler.

OUR SUPPORT FOR FARMERS

Dealership network

A network of experts at your service,
wherever you are.

The connected solution

Easy Manager is a simple and
flexible tool for managing,
optimising and securing the
operational monitoring of your
machines.

Maintenance contracts

3 levels of contracts that provide
maintenance anywhere in the world.
Entrust the maintenance of your
equipment to your dealer.

Original spare parts

With more than 70,000 references
available, your Manitou dealer
provides expertise and service on a
daily basis!

Warranty extension

The warranty extension is for
all Manitou vehicles. Use your
equipment with peace of mind.

“

The Manitou telehandler has been a game-changer on our farm! Offloading a full truck used to be a time-consuming task. Now, with the Manitou, I can handle it myself in just 15 minutes. It's incredibly efficient and has saved me a significant amount of valuable time. A fantastic investment!
